

Overview

At Hartman, we love what we do. What we do is craft elegant custom windows and doors out of the finest hardwood species. Hartman is a family-run company, working closely with our clients to blend our skill and knowledge with their vision to make their dream design a reality. We are at our core a team – a team of craftsmen, engineers, and hardwood fanatics with a diverse range and depth of experience that span all aspects of construction and design. It is our mission to provide you with products of uncompromising quality. We continually strive to improve our products and the means by which we manufacture them. Some say it's an obsession. At Hartman, it's just what we do.

If you have any questions or would like to schedule an appointment to discuss any potential applications, give us a call at **(561) 296-9600** or visit us online at **www.hartmanwindows.com**.

PRODUCTS

Two lines of impact-approved products – European and American – available in nearly any size, shape, and configuration. The European line has a 2 11/16” thick sash, with an overlap between the sash and jamb. The American line has 2 1/4” thick sash, and is flush between sash and jamb.

WINDOWS

- Outswing: operable & fixed, single & French
- Inswing: operable & fixed, single & French
- Tilt & turn
- Double/single hung
- Awning & hopper
- Direct set

DOORS

- Inswing: operable & fixed, single & French
- Outswing: operable & fixed, single & French
- Bi-fold: inswing & outswing
- Lift & slide: traditional, corner, pocket

WOOD

- First-grade mahogany, with additional species available (such as teak, cherry, oak, walnut, ipe, cypress)
- Split-species available to complement interior and exterior palettes
- Wood acclimates to environment prior to fabrication for optimum precision
- Stiles are laminated to achieve maximum stability at elevated heights

FINISH

- Three coats of finish: one coat of primer and two coats of topcoat
- Sikkens stains provide maximum protection while enhancing the natural appearance of wood. Nine standard colors, with custom finishes easily available.
- Sherwin Williams premium paint coating
- Split-finish available

GLAZING

- Glazing per project specifications and requirements
- Can accommodate most configurations and make-ups from 1/4” single glazed to 1-3/16” laminated insulated glass
- Options include monolithic, laminated, insulated, tinted, low-e, turtle, and smart (i.e., electric privacy) glass
- Customized wood panels, including raised, flat, louvered, and v-groove

HARDWARE

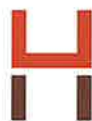

- Multi-point locking systems featured on all operable windows and doors
- Stainless steel, coastal, and brass hinges
- Seven standard handles in oil-rubbed bronze, satin nickel, and brass finishes. Multitude of premium manufacturers also available. Custom finishing offered for design customization.
- Proprietary solid architectural bronze threshold on inswing and outswing doors. ADA compliant also an option, as well as custom design.
- Variety of accessories available, including (but not limited to): stops and hold-opens, sash restrictors, concealed alarm contacts, automation, electronic locks, biometric hardware, and panic hardware

ACCESSORIES/CUSTOMIZATION

- Five standard astragal profiles. Custom also available.
- Pull-down, fixed, swinging, pull-across screens. Automated and manual.
- Solar and blackout shades. Automated and manual.
- Mechanical, fixed, and operable serpentine louvers
- Jamb extensions
- Brickmould and/or exterior casing in virtually any size and detail

SERVICE

- Every order, regardless of size, is met with devoted and exacting service
- Pre-production:
 - Work closely with architects, designers, and builders to realize full potential of desired doors and windows
 - Offer sophisticated technical experience and expertise in custom fenestration products, construction, and manufacturing
 - Close collaboration on all phases of shop drawings, including elevations, handings, and details. Detailed shop drawings submitted for approval prior to manufacturing.
- Production:
 - Communicate with you throughout the entire production process
 - Stage production to meet delivery schedules
- Post-production:
 - Warranty protection
 - Certified installers in-house
 - On-site installation support
 - Final quality review and inspection
 - Product support at your call
 - Maintenance contracts available

HARTMAN
WINDOWS & DOORS

Engineering & Construction

Hartman uniquely combines old-world craftsmanship with cutting-edge precision machining. All units are meticulously designed and engineered with advanced computer technology for maximum accuracy and constructed with European machinery that is exact to 1/64th of an inch. Our engineering and construction guarantee that your windows and doors are elegant, sturdy, and able to weather any environment. **We live to take on any challenge.**

Impact-Approval

Hartman has invested significantly in the research and development of impact-rated windows and doors that can withstand the harshest weather conditions. This depth of expertise translates into many benefits for you and your clients: our products can endure the highest levels of wind and water pressure; resist objects at high projectile speeds; provide enhanced security against forced entry; and ensure a quieter environment with better STC ratings. All of our products are made to the same demanding specifications whether the project is located on the coast or elsewhere. **The durability of your windows and doors will be unsurpassed.**

Company

Hartman Windows & Doors specializes in the custom design and fabrication of wood windows and doors of incomparable quality. Our products are crafted to complement and enhance premium architecture and design for new construction and renovation. We manufacture the finest products for exterior fenestration, each one custom designed in collaboration with our clients. We are constantly innovating, developing new products and processes to engineer creative and effective solutions to meet our clients' most demanding standards. **Our uncompromising commitment to what we do means that our clients never have to settle.**
